SYNTHETIC METALS

# Subject Index of Volume 100

Alkali–metal graphite intercalation compounds
Discrete–variational $X\alpha$ calculations of graphite and alkali–metal graphite intercalation compounds, 279
Annealing
Change in the emission color and the quantum efficiency enhancement in urethane-substituted polythiophene/*tris*(8-hydroxyquinoline) aluminum double layer light-emitting devices, 223

Boron fluoride–ethyl ether
An investigation of the electropolymerization of terthiophene in boron fluoride–ethyl ether, 285
BTEM-PPV
Light-emitting electrochemical cells and light-emitting diodes based on ionic conductive poly(phenylene vinylene): a new chemical sensor system, 71
Buried interfaces
Buried interfaces: poly(*p*-phenylene-vinylene)-on-ITO, 163

Capacity
Microstructure and electrochemical properties of some synthetic carbons, 195
Carbazole
Synthesis and electrochemical characterization of a new polymer constituted of alternating carbazole and oxadiazole moieties, 297
Carbon nanotubes
Structural properties of some conducting polymers and carbon nanotubes investigated by SERS spectroscopy, 13
Condensation reaction
Poly(phenylene sulfide–phenyleneamine–phenyleneamine) (PPSAA) —a soluble model for polyaniline, 79
Conducting and optically active polymers
A systematic theory for optical properties of phenylene-based polymers, 29
Conducting polymer
Studies on water soluble conducting polymer. Aniline initiated polymerization of *m*-aminobenzene sulfonic acid, 233
Conducting polymers
Structural properties of some conducting polymers and carbon nanotubes investigated by SERS spectroscopy, 13
Conductive polymer
Syntheses and characterisation of electrically conductive and fluorescent poly[3-(ω-bromoalkyl)thiophenes], 269
Conductivity
Synthesis, characterization and electrical properties of polyimines derived from selenophene, 187
Conformation
Dependence of multiplicity on conformation: ground states of *o*-, *m*- and *p*-phenylenediamine dications, 261
Conjugated polymers
Poly(2,5-dialkoxy-*p*-phenylenebutadiynylene)s—Novel rigid conjugated polymers with liquid crystalline property, 61
Coumarin-urea
Photoluminescence and electroluminescence properties of coumarin-urea/poly(*N*-vinylcarbazole) blends, 291

Cyclic voltammetry
Synthesis and electrochemical characterization of a new polymer constituted of alternating carbazole and oxadiazole moieties, 297

Dedope
Synthesis of non-doped poly(3,4-ethylenedioxythiophene) and its spectroscopic data, 237
Dendrimers
Theoretical characterization of phenylene-based oligomers, polymers, and dendrimers, 141
Derivatives
Poly(phenylene sulfide–phenyleneamine–phenyleneamine) (PPSAA) —a soluble model for polyaniline, 79
Diradical
Dependence of multiplicity on conformation: ground states of *o*-, *m*- and *p*-phenylenediamine dications, 261
Discrete–variational $X\alpha$ calculation
Discrete–variational $X\alpha$ calculations of graphite and alkali–metal graphite intercalation compounds, 279
DNA sensors
Toward intelligent polymers: DNA sensors based on oligonucleotide-functionalized polypyrroles, 89
Doped polyacetylene
Magnetoresistance of the metallic polyacetylene, 3

Electroluminescence
Light-emitting electrochemical cells and light-emitting diodes based on ionic conductive poly(phenylene vinylene): a new chemical sensor system, 71
Photoluminescence and electroluminescence properties of coumarin-urea/poly(*N*-vinylcarbazole) blends, 291
Electrolytes
Reflection and absorption studies on polypyrrole films electrochemically prepared with different electrolyte types, 217
Electron Paramagnetic Resonance
$Li^+$ doping-induced localization in polyaniline, 55
Electron spin resonance
Electron localization studies of alkoxy polyanilines, 205
Emeraldine oxidation state
Oligomers and isomers: new horizons in poly-anilines, 131
Energy transfer
Change in the emission color and the quantum efficiency enhancement in urethane-substituted polythiophene/*tris*(8-hydroxyquinoline) aluminum double layer light-emitting devices, 223

Fluorescence
Synthesis and electrochemical characterization of a new polymer constituted of alternating carbazole and oxadiazole moieties, 297
Fluorine
Nuclear magnetic resonance study of fluorine–graphite intercalation compounds and graphite fluorides, 169
Förster energy transfer
Time-resolved Förster energy transfer in polymer blends, 95

Elsevier Science S.A.

GICs
Nuclear magnetic resonance study of fluorine–graphite intercalation compounds and graphite fluorides, 169
Graphite
Nuclear magnetic resonance study of fluorine–graphite intercalation compounds and graphite fluorides, 169
Discrete–variational $X\alpha$ calculations of graphite and alkali–metal graphite intercalation compounds, 279
Graphite-like pyropolymer
Microstructure and electrochemical properties of some synthetic carbons, 195

Hydrogen bond
Change in the emission color and the quantum efficiency enhancement in urethane-substituted polythiophene/*tris*(8-hydroxyquinoline) aluminum double layer light-emitting devices, 223

Indium–tin–oxide
Buried interfaces: poly(*p*-phenylene-vinylene)-on-ITO, 163
Interpenetrating polymer network
Semi-interpenetrating polymer networks based on polyaniline and polyvinyl alcohol–glutaraldehyde, 241
Iron phthalocyanines
Phthalocyaninatoiron complexes with tridentate ligands, 123
IR spectrum
Synthesis of non-doped poly(3,4-ethylenedioxythiophene) and its spectroscopic data, 237
Isomers
Oligomers and isomers: new horizons in poly-anilines, 131
Isotherm
Comparative studies on Langmuir–Schaefer films of polyanilines, 249

Kramers–Kronig technique
Reflection and absorption studies on polypyrrole films electrochemically prepared with different electrolyte types, 217

Langmuir–Schaefer (LS)
Comparative studies on Langmuir–Schaefer films of polyanilines, 249
LEC
Light-emitting electrochemical cells and light-emitting diodes based on ionic conductive poly(phenylene vinylene): a new chemical sensor system, 71
$Li^+$ doping
$Li^+$ doping-induced localization in polyaniline, 55
Liquid crystalline polymers
Poly(2,5-dialkoxy-*p*-phenylenebutadiynylene)s—Novel rigid conjugated polymers with liquid crystalline property, 61
Lithium insertion
Microstructure and electrochemical properties of some synthetic carbons, 195
Localization
$Li^+$ doping-induced localization in polyaniline, 55

Magnetic measurements
Electron localization studies of alkoxy polyanilines, 205
Mesomolecules
Oligomers and isomers: new horizons in poly-anilines, 131
Metallic temperature dependence of resistivity
Magnetoresistance of the metallic polyacetylene, 3
Metathesis
Microstructure and electrochemical properties of some synthetic carbons, 195
Microwave Dielectric Constant
$Li^+$ doping-induced localization in polyaniline, 55
Mößbauer spectroscopy
Phthalocyaninatoiron complexes with tridentate ligands, 123
Modelling
Enhanced photostability of poly(1,3-phenylene diphenylvinylene)-derivatives by diphenyl-substitution, 113
Morphology
Semi-interpenetrating polymer networks based on polyaniline and polyvinyl alcohol–glutaraldehyde, 241
Multiplicity
Dependence of multiplicity on conformation: ground states of *o*-, *m*- and *p*-phenylenediamine dications, 261

Negative magnetoresistance
Magnetoresistance of the metallic polyacetylene, 3
NMR spectrum
Synthesis of non-doped poly(3,4-ethylenedioxythiophene) and its spectroscopic data, 237

Oligomers
Oligomers and isomers: new horizons in poly-anilines, 131
Theoretical characterization of phenylene-based oligomers, polymers, and dendrimers, 141
Oligonucleotide
Toward intelligent polymers: DNA sensors based on oligonucleotide-functionalized polypyrroles, 89
Oligothiopenes
Electronic and dynamical effects from the unusual features of the Raman spectra of oligo and polythiophenes, 101
Optical absorption and emission spectroscopy
A systematic theory for optical properties of phenylene-based polymers, 29
Optical properties
Semi-interpenetrating polymer networks based on polyaniline and polyvinyl alcohol–glutaraldehyde, 241
Oxadiazole
Synthesis and electrochemical characterization of a new polymer constituted of alternating carbazole and oxadiazole moieties, 297

PANI
Comparative studies on Langmuir–Schaefer films of polyanilines, 249
PEOA
Comparative studies on Langmuir–Schaefer films of polyanilines, 249
Photoinduced absorption spectroscopy
A systematic theory for optical properties of phenylene-based polymers, 29
Photoluminescence
Enhanced photostability of poly(1,3-phenylene diphenylvinylene)-derivatives by diphenyl-substitution, 113
Photoluminescence and electroluminescence properties of coumarin-urea/poly(*N*-vinylcarbazole) blends, 291
Photooxidation
Enhanced photostability of poly(1,3-phenylene diphenylvinylene)-derivatives by diphenyl-substitution, 113
POAS
Comparative studies on Langmuir–Schaefer films of polyanilines, 249
Polyaniline
Structural properties of some conducting polymers and carbon nanotubes investigated by SERS spectroscopy, 13
$Li^+$ doping-induced localization in polyaniline, 55
Poly(phenylene sulfide–phenyleneamine–phenyleneamine) (PPSAA)—a soluble model for polyaniline, 79
Oligomers and isomers: new horizons in poly-anilines, 131
Semi-interpenetrating polymer networks based on polyaniline and polyvinyl alcohol–glutaraldehyde, 241
Polyaniline and derivatives
Electron localization studies of alkoxy polyanilines, 205
Poly-anilines
Oligomers and isomers: new horizons in poly-anilines, 131
Polyanilines
Comparative studies on Langmuir–Schaefer films of polyanilines, 249
Polyconjugated molecules
Electronic and dynamical effects from the unusual features of the Raman spectra of oligo and polythiophenes, 101

Poly(2,5-dialkoxy-*p*-phenylenebutadiynylene)s
Poly(2,5-dialkoxy-*p*-phenylenebutadiynylene)s—Novel rigid conjugated polymers with liquid crystalline property, 61
Poly(3,4-ethylenedioxythiophene)
Synthesis of non-doped poly(3,4-ethylenedioxythiophene) and its spectroscopic data, 237
Polyimines
Synthesis, characterization and electrical properties of polyimines derived from selenophene, 187
Poly(*m*-amino benzene sulfonic acid)
Studies on water soluble conducting polymer. Aniline initiated polymerization of *m*-aminobenzene sulfonic acid, 233
Polymer blends
Time-resolved Förster energy transfer in polymer blends, 95
Polymer/organic double layer LED
Change in the emission color and the quantum efficiency enhancement in urethane-substituted polythiophene/*tris*(8-hydroxyquinoline) aluminum double layer light-emitting devices, 223
Polymers
Toward intelligent polymers: DNA sensors based on oligonucleotide-functionalized polypyrroles, 89
Theoretical characterization of phenylene-based oligomers, polymers, and dendrimers, 141
Poly(*p*-phenylene-vinylene)-on-ITO
Buried interfaces: poly(*p*-phenylene-vinylene)-on-ITO, 163
Polypyrrole films
Reflection and absorption studies on polypyrrole films electrochemically prepared with different electrolyte types, 217
Polyterthiophene
An investigation of the electropolymerization of terthiophene in boron fluoride–ethyl ether, 285
Polythiopenes
Electronic and dynamical effects from the unusual features of the Raman spectra of oligo and polythiophenes, 101
Polythiophene
Structural properties of some conducting polymers and carbon nanotubes investigated by SERS spectroscopy, 13
Poly[3-(ω-bromoalkyl)thiophenes]
Syntheses and characterisation of electrically conductive and fluorescent poly[3-(ω-bromoalkyl)thiophenes], 269
POT
Comparative studies on Langmuir–Schaefer films of polyanilines, 249
PPV-derivative
Enhanced photostability of poly(1,3-phenylene diphenylvinylene)-derivatives by diphenyl-substitution, 113
Pyrolysis
Microstructure and electrochemical properties of some synthetic carbons, 195

Raman scattering
Structural properties of some conducting polymers and carbon nanotubes investigated by SERS spectroscopy, 13

Selenophene
Synthesis, characterization and electrical properties of polyimines derived from selenophene, 187
Soluble
Syntheses and characterisation of electrically conductive and fluorescent poly[3-(ω-bromoalkyl)thiophenes], 269
Sub-picosecond spectroscopy
Time-resolved Förster energy transfer in polymer blends, 95
Surface studies
Structural properties of some conducting polymers and carbon nanotubes investigated by SERS spectroscopy, 13
Synthesis
Studies on water soluble conducting polymer. Aniline initiated polymerization of *m*-aminobenzene sulfonic acid, 233

The electrochemical cycling stability
An investigation of the electropolymerization of terthiophene in boron fluoride–ethyl ether, 285
Through-bond interaction
Dependence of multiplicity on conformation: ground states of *o*-, *m*- and *p*-phenylenediamine dications, 261
Through-space interaction
Dependence of multiplicity on conformation: ground states of *o*-, *m*- and *p*-phenylenediamine dications, 261
Transport measurements
Electron localization studies of alkoxy polyanilines, 205
*s*-Triazines
Phthalocyaninatoiron complexes with tridentate ligands, 123
Tridentate ligands
Phthalocyaninatoiron complexes with tridentate ligands, 123
Trimeric ligand complexes
Phthalocyaninatoiron complexes with tridentate ligands, 123

Urethane-substituted polythiophene
Change in the emission color and the quantum efficiency enhancement in urethane-substituted polythiophene/*tris*(8-hydroxyquinoline) aluminum double layer light-emitting devices, 223
UV–Vis absorption
Poly(phenylene sulfide–phenyleneamine–phenyleneamine) (PPSAA)—a soluble model for polyaniline, 79
UV-VIS-NIR Absorption
$Li^+$ doping-induced localization in polyaniline, 55

Water soluble
Studies on water soluble conducting polymer. Aniline initiated polymerization of *m*-aminobenzene sulfonic acid, 233
